Daniel Martins, MD-PhD, is a physician and researcher in translational neuroscience at the Institute of Psychiatry, Psychology & Neuroscience (IoPPN), King's College London, and at the Department of Clinical Neurosciences and Mental Health, Faculty of Medicine, University of Porto, where he is affiliated with RISE-Health. His research employs multimodal neuroimaging in translational psychiatry to characterize pharmacological effects, identify biomarkers and disease mechanisms, and map potential therapeutic targets. In parallel, he has contributed to the development and implementation of more personalized psychiatry through normative modeling approaches, exploring their advantages in terms of prognosis and symptom profiling.
